

ASSESSMENT 2 BRIEF

MODULE CODE	COM6033
MODULE TITLE	Applied Artificial Intelligence
MODULE LEADER	Dr Antesar Shabut
ASSESSMENT TITLE	Guidance Report (2000 words)
WEIGHTING	40%

ASSESSMENT LEARNING OUTCOMES

Upon successful completion of this assessment, you will be able to:

1. Apply the theoretical underpinnings of algorithms and techniques specific to artificial intelligence.
2. Critically evaluate the principles and algorithms of artificial intelligence.
3. Evaluate the ethical considerations of artificial intelligence and computing.
4. (Not applicable to this assessment) Implement artificial intelligence algorithms to a specific problem.

INSTRUCTIONS

For this assessment, begin by selecting an organisation or business within a specific industry or sector as the focus of your investigation. The 2000-word report should analyse how AI and machine learning systems can be applied to address a relevant problem or opportunity within that context. Write the report as if intended for the organisation, including background, context, and rationale for your choice. Critically discuss relevant AI and ML algorithms, outlining their theoretical foundations, potential applications, and their advantages and limitations in addressing the identified issue.

You should also evaluate the ethical implications of applying AI and machine learning from both human and machine perspectives, considering factors such as bias, fairness, transparency, and accountability. Your evaluation should be grounded in Responsible AI principles and methodologies.

- Choose a specific organisation and sector as your case study.
- Do not use AI tools (e.g. ChatGPT) to complete any part of the assignment.
- Use credible academic sources (peer-reviewed journals and conference papers).
- Follow APA 7th edition referencing throughout.

SUBMISSION DETAILS

RELEASE DATE	24 October 2025
SUBMISSION DATE	19 December 2025
DELIVERABLES	2000-word report in Microsoft Word format
SUBMISSION DETAILS	Submit your assignment by uploading it to Moodle <u>before midday</u> on the submission date. This deadline will be automatically and strictly enforced. If your submission is late, your grade may be affected. If you have any issues submitting your work, you must email the assessment team and copy in the module leader <u>before the assessment due time</u>. Do not leave your submission until the last minute to avoid any penalties due to problems with the submission portal. Assessment Team: assessment@leedstrinity.ac.uk Module Leader: a.shabut@leedstrinity.ac.uk We may ask for a demonstration of your work following the submission. If needed, this will be communicated to you individually via email. Please check your emails regularly.

Your feedback / feed forward and mark for this assessment will be provided within 15 working days.

MARKING CRITERIA

Marks are awarded based on the following criteria. Within each part, aim to complete the work for each section before moving on to the next. The following banded marking scheme is used:

<i>Exceptional 1st</i>	100/95/92		<i>2:ii</i>	58/55/52
<i>Outstanding 1st</i>	88/85/82		<i>3rd</i>	48/45/42
<i>1st</i>	78/75/72		<i>Bare Fail</i>	38/35/32
<i>2:i</i>	68/65/62		<i>Fail</i>	25/20/10/0

If you have completed all the preparatory exercises and attended your classes, the estimated additional time required to PASS this assessment is approximately 40 hours.

To obtain a 3rd mark (40%), you must have:	○ Demonstrated a limited understanding of the topic and its application to the problem. ○ Included some recommendations or solutions, though with limited integration. ○ Shown a basic understanding of ethical aspects when proposing AI-driven solutions. ○ Applied a basic understanding of AI algorithms and techniques. ○ Presented a limited analysis with general conclusions. ○ Included a minimum of two references.
To obtain a 2:ii mark (50%), you must have (in addition to the above):	○ Demonstrated a clearer understanding of the topic and its application to the problem. ○ Provided mostly logical recommendations or solutions. ○ Shown a good understanding of ethical aspects in AI-driven solutions. ○ Applied a good understanding of AI algorithms and techniques. ○ Conducted a more structured analysis with general conclusions. ○ Included at least four references, mostly consistent in format.
To obtain a 2:i mark (60%), you must have (in addition to the above):	○ Demonstrated a comprehensive understanding of the topic and apply it effectively to the problem. ○ Provided mostly accurate recommendations with some creativity. ○ Shown a very good understanding of ethical aspects in AI-driven solutions. ○ Applied a very good understanding of AI algorithms and techniques. ○ Conducted a strong analysis with appropriate conclusions. ○ Included at least six references, consistent and accurate.
To obtain a 1st mark (70%), you must have (in addition to the above):	○ Demonstrated an excellent understanding of the topic and applied it effectively to the problem. ○ Provided clear, logical, and creative recommendations or solutions. ○ Presented an accurate, confident, and coherent argument. ○ Applied a comprehensive understanding of AI algorithms and techniques. ○ Clearly addressed ethical considerations in AI-driven solutions. ○ Conducted insightful analysis with well-supported conclusions. ○ Included references that are excellent in number, format, and quality.

USE OF GENERATIVE ARTIFICIAL INTELLIGENCE IN THIS MODULE

You may use generative AI such as Microsoft Copilot to assist you in the process of undertaking the assessment in the following ways: brainstorming, research, planning, feedback, editing.

All use of generative AI must be explicitly acknowledged, and any artificially generated content (e.g. images) explicitly labelled, with the source of the AI tool referenced using current APA referencing conventions. You can find further guidance on the library website on their AI webpage).

In submitting your assignment, you agree to disclose the extent to which you have used generative AI in preparing this work and include evidence of your AI use in your appendices (e.g. dated screen shots of your use of this tool or copy and paste your AI chat into Word).

Failure to disclose your generative AI use may result in a zero for your assignment and a referral for academic misconduct (see the Student Academic Misconduct Policy under Essential Info in the MyLTU app).

Include one of the following statements on your assignments.

Either:

This assignment used generative AI in the following ways for the purposes of completing the assignment (choose 1 to 5 of the following): brainstorming, research, planning, feedback, editing.

Or:

This assignment did not use generative AI for the purposes of completing the assignment.

ACADEMIC MISCONDUCT

Academic Misconduct includes all forms of academic dishonesty, whether intentional or accidental, that compromise the integrity of the University's assessment processes. It is essential that you review our [Student Academic Misconduct Policy](#) to understand the guidelines and the serious consequences that may arise if they are not followed.

HELP AND SUPPORT

- Please use the module handbook and the [Computer Science Community Teams site](#) as a source of information. Do try and find the answer out yourself before reaching out for help.
- Support will be provided via Microsoft Teams and email during office working hours. You can also ask questions during your timetabled sessions. You may request a one-to-one meeting with a tutor during their published office hours.
- The Student Support team are available seven days a week to support you in all aspects of student life. This could be for support relating to your course, your accommodation or for more general advice such as relationships or your wellbeing. Log in to the LTU app to access support services.
- The full set of university guidelines on assessments, deadlines, and extensions is available on the LTU app, please familiarise yourself with the documentation.
